Rover Scout Workshop 2024

-The Power of Self-Help, Mutual Assistance,
and Disaster Volunteerism Needed Now-
Izunokuni City, Shizuoka Prefecture, Japan
22 – 24 February 2025

Guidelines

Background:

The series of disasters in 2024 has caused extensive damage and greatly impacted our lives. Recovery and restoration efforts are still ongoing, especially in areas hit hard by major events like the Noto Peninsula earthquake and the widespread flooding from heavy rains.

In light of these challenges, the need for each of us to develop knowledge and take personal initiative to protect ourselves ("self-help") has become crucial. Equally important is building the capacity for mutual support ("mutual assistance") within our communities and fostering strong connections with those around us. Additionally, "disaster volunteerism" plays a vital role, requiring swift, well-coordinated action in the wake of disasters.

This year's program is designed to equip participants with essential knowledge and skills in "self-help" and "mutual assistance" through both classroom learning and hands-on experiences, including practical training in first aid and fire suppression. Participants will also gain valuable insights into "disaster volunteerism," with opportunities for volunteer simulation exercises and food distribution drills, ultimately preparing them to play an active role in creating a sustainable community.

Purpose of the Workshop:

Our program aims to

1. Reaffirm the societal value of scouting skills
2. Deepen understanding of the mindset and competencies needed as Rover Scouts
3. Provide meaningful guidance for future Rovering activities

Workshop Overview and precautions:
